**16+ 1ST, 2ND PFIZER AND
3RD PRIMARY DOSES**

AND

BOOSTERS FOR ELIGIBLE PATIENTS

BRING A FACE COVERING

YOUR VACCINE QUESTIONS ANSWERED

Is the vaccine safe?

Yes. The COVID-19 vaccines approved for use in the UK have met strict standards of safety, quality and effectiveness. They can cause some side effects, but not everyone gets them. Any side effects are usually mild and should not last longer than a week.

Can I have the vaccine if I don't eat pork?

The approved COVID-19 vaccines do not contain any animal products or egg. This means that you can have the vaccine if you are vegan or vegetarian, or if you do not eat pork.

Will the vaccine affect my fertility?

There's no evidence the COVID-19 vaccines have any effect on your chances of becoming pregnant.

Can I have the vaccine if I am pregnant or breast-feeding?

Yes, you can have the vaccine if you are pregnant, breast-feeding or trying to get pregnant. If you are pregnant it's preferable for you to have the Pfizer/BioNTech or Moderna vaccine because they've been more widely used during pregnancy in other countries and have not caused any safety issues.

The COVID-19 vaccine cannot give you or your baby COVID-19.
